Subject: Please do not issue permits for the Dewey-Burdock uranium mine

Dear EPA decision-maker,

I'm writing to comment on the applications the Dewey-Burdock Uranium mine.

The location of this proposed mine is not suitable for this type of operation because the stata is unstable and full of perforations. Use of the proposed techniques poses an unacceptable risk to the groundwater aquifer.

Please insist that a full study taking these risks into account be performed before considering the application for this unusually dangerous and destructive method of uranium extraction.
